

# COMMUNITY ENGAGEMENT WINDOW #2 SUMMARY

## TRUCKEE-DONNER RECREATION AND PARK DISTRICT COMPREHENSIVE MASTER PLAN

# Window 2 Engagement

## Overview

### Survey (Open Participation)

**300+ TOTAL SURVEY RESPONSES**

The second engagement window was completed during the month of September. While the second survey was live, the Comprehensive Plan team led and attended various community events in Truckee to encourage more survey responses and collect verbal community feedback.

#### OPEN HOUSE

Truckee residents were invited to come to an open house at the Rec Center to share their input for the strategies developed from the window 1 community engagement survey.

About half of the attendees were TDRPD board members while the other half were Truckee residents who either were at the rec center for this event, or stopped by while they were there for a different reason.

#### GOLDENS MEET AND GREET

At the start of their weekly event, hard copy surveys were given to the seniors. After a presentation of the project and five draft strategies, conversations about a stand-alone

### Community Workshops & Events

- 2 COMMUNITY EVENTS - TRUCKEE BLOCK PARTY + FAMILY FARM FESTIVAL**
- 2 GROUP MEETINGS - SENIORS + ROTARY**

**300+ PARTICIPANTS**

senior center became a popular comment by this group. General unfamiliarity with the status of parks and the need for more raised questions on how they should respond to some questions. Some seniors decided to take home the strategy fliers to fill the survey out at home with more time to think.

#### ROTARY CLUB LUNCH

Hand out surveys and strategy flyers were distributed to each table during lunch, and a general announcement encouraged members to take a look at the boards with more information outside of the room before or after their meeting.

#### TRUCKEE BLOCK PARTY

At the TDRPD booth, Truckee residents were able to learn more about the status of the Comprehensive plan. The strategies overview board with a mini-golf activity welcomed conversations about what people wanted to see in their community.

- 3 WEEKS OF AN INTERACTIVE ACTIVITY POSTED AT THE RECREATION CENTER**

Open House at the Truckee Rec Center

Engagement outreach during the Golden Seniors meeting

Conversations with residents at this event were focused on improving the existing parks, adding indoor facilities, and wanting separated trails from roadways to get to and from parks in Truckee.

## FAMILY FARM FESTIVAL

At the TDRPD booth, a kid-friendly activity got the whole family involved in the window 2 survey. Participants were invited to vote on each strategy using marbles. The color of the marble indicated whether the voter felt the strategy was important (green) or not as important (red).

Residents of all ages were especially enthusiastic about improving existing parks, adding indoor recreation spaces and improving and adding more trails to and within parks.

## ADVERTISEMENTS AT THE REC CENTER

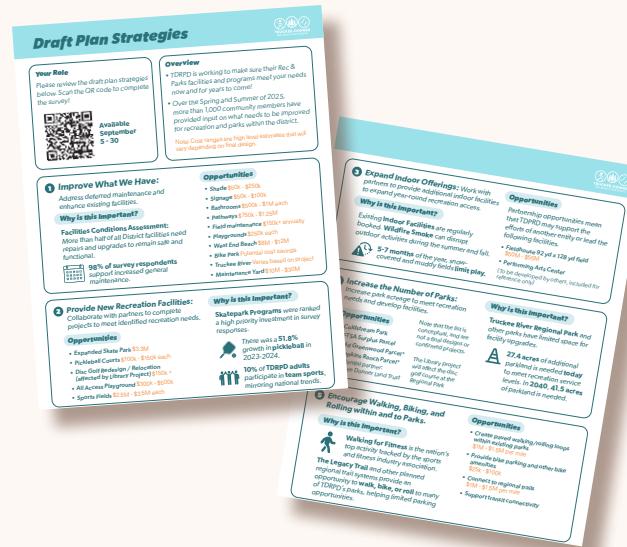

Between the window 2 engagement community workshops and events, one of the project boards was left up at the rec center entrance with QR codes to the online survey as well as hand written surveys available.

These boards along with informative posters and take home flyers opened participation to the survey for those who frequent the Rec Center. Parents visiting for day care or after school activity pick up and drop off were the primary demographic of this outreach effort.

Emails and social media posts by the TDRPD added to the total survey responses for online engagement.

# Satisfaction with the Draft Strategies

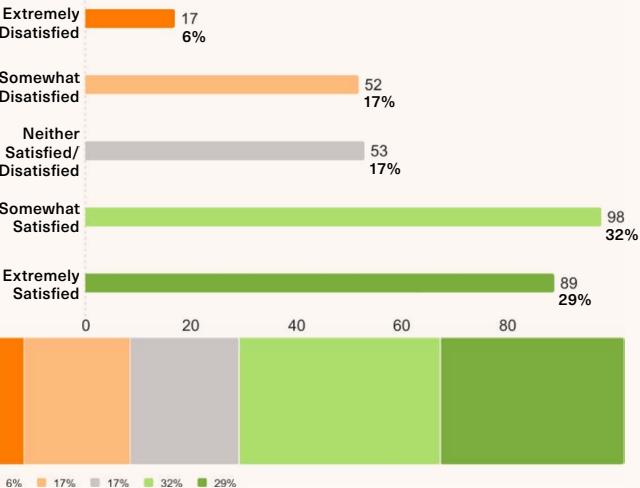

## Q1-Satisfaction with Draft Strategy #1:

Improve What We Have: Address deferred maintenance and enhance existing facilities.

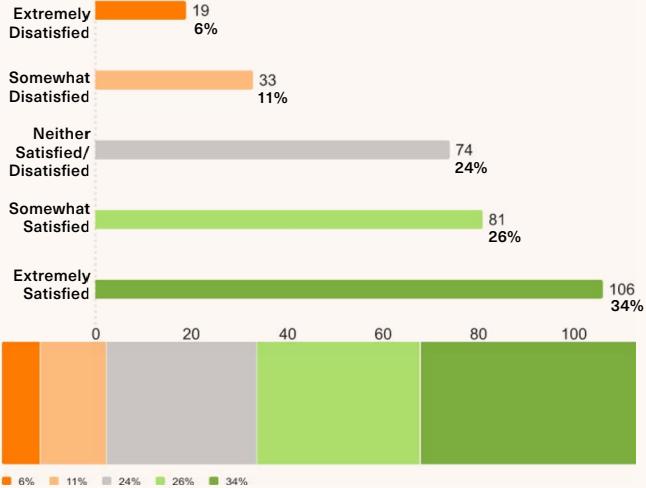

## Q2-Satisfaction with Draft Strategy #2:

Provide New Recreation Facilities: Collaborate with partners to complete projects to meet identified recreation needs.

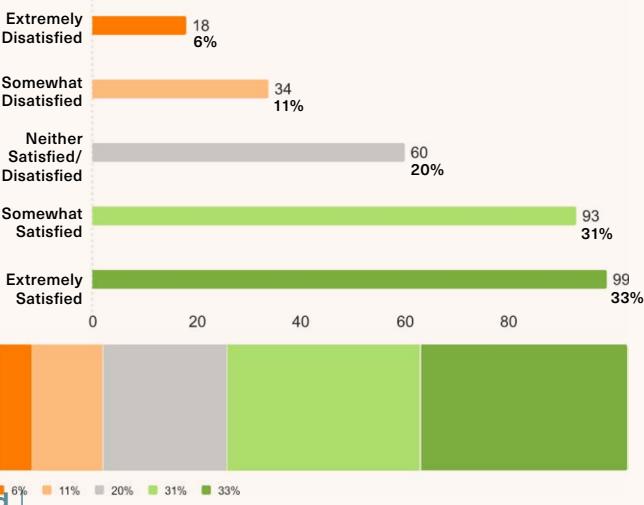

## Q3-Satisfaction with Draft Strategy #3:

Expand Indoor Offerings: Work with partners to provide additional indoor facilities to expand year-round recreation access.

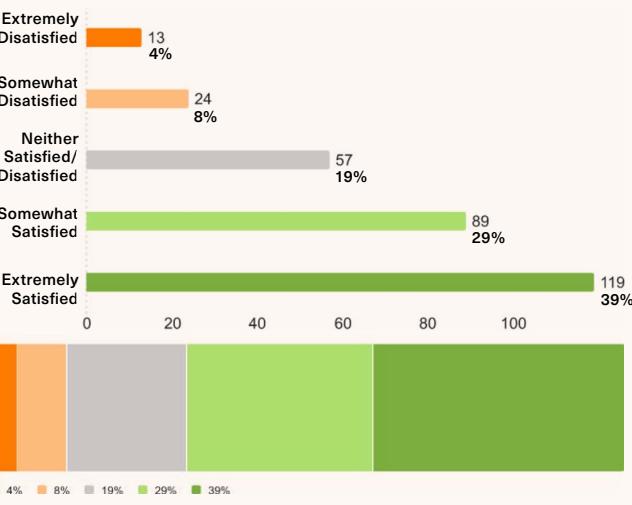

## Q4-Satisfaction with Draft Strategy #4:

Increase the number of parks: Increase park acreage to meet recreation needs and develop facilities.

## Q5-Satisfaction with Draft Strategy #5:

Encourage Walking, Biking, and Rolling within and to Parks.

## Key Takeaway - Satisfaction:

Overall, all strategies received a combined satisfaction rate between 62%-69%.

The community expressed the highest satisfaction with **Draft Strategy #5: Encourage Walking, Biking, and Rolling Within and To Parks**,

**Encourage Walking, Biking, and Rolling Within and To Parks**, which received the most extremely and somewhat satisfied selections.

# Urgency of the Draft Strategies

Q6-Please rate the urgency of the draft plan strategies.

Which would you feel should happen right away?

# Importance of the Draft Strategies

Q7-Please rate the importance of the draft plan strategies.

Which would you feel are most important?

## Key Takeaway - Urgency:

Survey respondents were asked to rate the urgency of five draft plan strategies. The results show that two strategies stood out significantly:

**Draft Strategy #1 ranked the highest**, with 44% of respondents rating it as very urgent and another 44% as medium urgent. **Draft Strategy #3 followed**, with 42% rating it as very urgent and 31% as medium urgent.

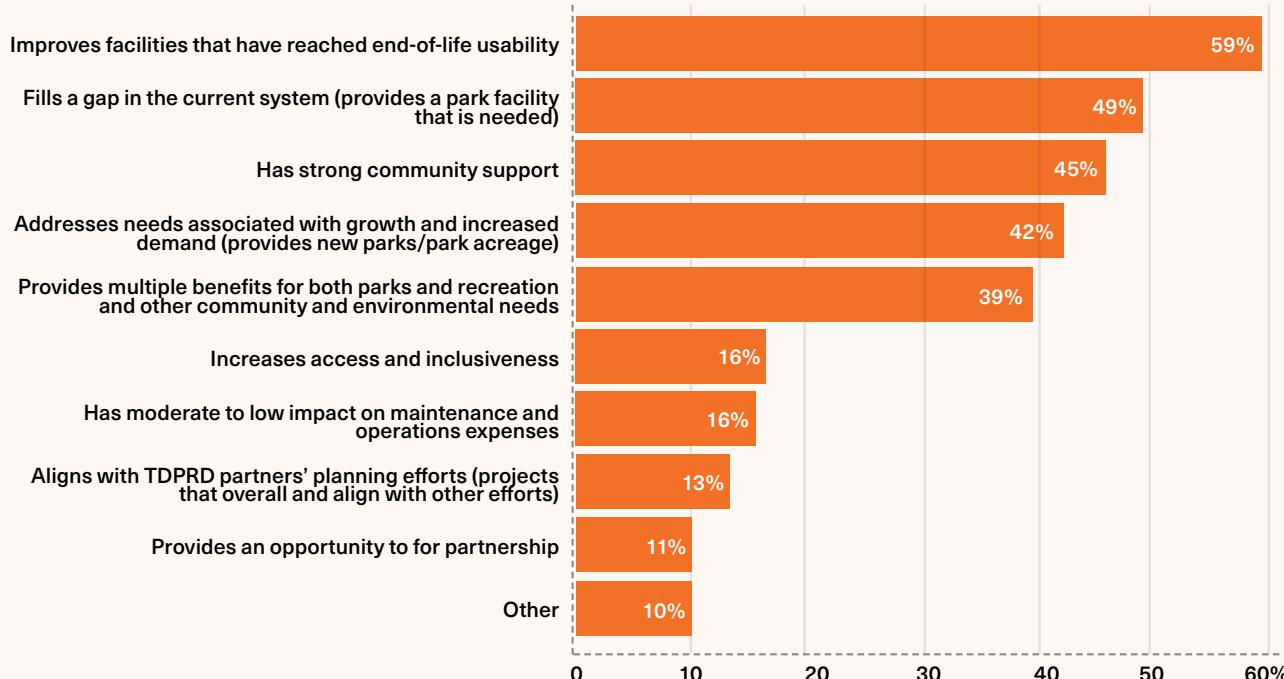

## Key Takeaway - Importance:

Survey respondents also rated the importance of the five draft strategies. Similar to the urgency results, Draft Strategies #5 and #3 stood out:

**Draft Strategy #1 ranked the highest**, with 50% rating it very important and 42% medium important. **Draft Strategy #3 followed**, with 45% rating it very important and 32% medium important.

# Decision-Making Criteria

**Q8:**  
Of the potential decision-making criteria listed below, what do you feel should guide TDRPD priorities? (select 3)

**\*NOTE:** This is a multi-choice question, we received 266 responses with 798 choices in total. The percentage of total respondents shows how many people (out of 266) selected each option, up to 100% for each option, reflecting which decision-making criterias should be prioritized.

## Key Takeaway :

### TOP 3 Decision-Making Criteria:

TOP 1: Improves facilities that have reached end-of-life usability

TOP 2: Fills a gap in the current system (provides a park facility that is needed)

TOP 3: Has strong community support

# How Would People Allocate \$100 Funds? (Overall Result)

Q9:

If you had an additional \$100, how would you allocate the funds among the categories listed below? [Be sure your total adds up to \$100]

Mean	Median	Min	Max	Standard Deviation
------	--------	-----	-----	--------------------

29.65\$	20\$	0\$	100\$	28.28\$
---------	------	-----	-------	---------

26.65\$	20\$	0\$	100\$	29.56\$
---------	------	-----	-------	---------

15.62\$	10\$	0\$	100\$	21.18\$
---------	------	-----	-------	---------

14.98\$	5\$	0\$	100\$	21.41\$
---------	-----	-----	-------	---------

13.10\$	10\$	0\$	100\$	17.58\$
---------	------	-----	-------	---------

**Draft Strategy #1:** Improve What We Have: Address deferred maintenance and enhance existing facilities.

**Draft Strategy #3:** Expand Indoor Offerings: Work with partners to provide additional indoor facilities to expand year-round recreation access.

**Draft Strategy #2:** Provide New Recreation Facilities: Collaborate with partners to complete projects to meet identified recreation needs.

**Draft Strategy #5:** Encourage Walking, Biking, and Rolling within and to Parks.

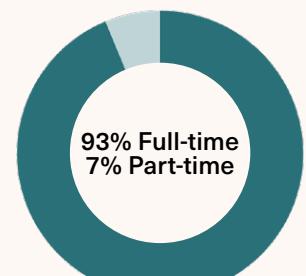

**Draft Strategy #4:** Increase the number of parks: Increase park acreage to meet recreation needs and develop facilities.

## Key Takeaway:

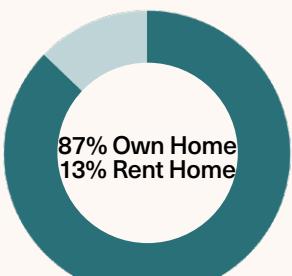

To better understand the variation between the **Mean** and **Median**, we analyzed the distribution of survey responses for each strategy, see following page.

## Additional Comments

**Q10:**  
Is there anything else we should consider or include in the Master Plan?  
(open-ended response)

126 open-ended survey respondents with 150 ideas shared.

- Residents were invited to share thoughts regarding anything else they felt the planning team should consider or include in the Comprehensive Master Plan.
- Out of the 306 respondents who took the survey, 126 respondents (41 percent) provided written comments.
- Of the 150 ideas shared by the 126 respondents, common themes included:
- Support a fieldhouse or indoor facility, in particular to address recreation access needs in the winter (22 comments / 15%)
- Preserve or improve the McIver Arena for equestrian use and/or as a multi-use arena (21 comments / 14%)
- Connection of pathways for walking and biking to neighborhoods and parks and a desire to have snow removal from paths and safe crossings (14 comments / 9%)
- Affordable programming, and spaces for children and teens (7 comments / 5%)
- Build the new skate park (6 comments / 4%)
- Add new sports fields (5 comments / 3%)
- Convert a sports field to synthetic turf (5 comments / 3%)

## Q10 - Is there anything else we should consider or include in the Master Plan?

126 Responses

Is there anything else we should consider or include in the Master Plan?

Truckee desperately needs more indoor facilities for children's play and community use. It should be a top priority to accomplish this.

Sunday food truck day

The parks in Reno are amazing. It such a privilege to live in a city that privileges open, accessible, and non-commercial spaces (i.e., spaces where you don't have to pay to exist in public). Keep up the great work!

"Accessibility and inclusivity" also includes financial access and inclusivity. The costs of renting TDRPD facilities is forcing the organizations who rent facilities to raise costs of participating in particularly the youth centric organizations that need the fields and facilities to provide valuable youth programs and opportunities. The increased costs impact families who may not qualify for scholarships but cannot afford multi kid or multi activity participation. TDRPD needs to put creative energy and thought into how to not pass their operating costs down to facility/field renters who then have to pass it down to the parents of kids. 10,000 foot view to consider with Master Planning. If parents cannot afford the costs of the programs then, kids will miss out on valuable childhood development opportunities and the TDRPD fields/facilities won't be effectively used and then the money raised/ allocated to design/construct/maintain will have been wasted.

Enhanced programming - more adult fitness options at pre/post work times. Explore if there is interest in mid day lap pool hours - maybe if there's not enough interest to justify M-F everyday, try a pilot program with 2-3 days per week. I'd love to be able to swim laps on my lunch break. Work with town/county to connect to paved bike loops in your parks with bike paths alongside roads. Something more than just the bike lanes we have - at least adding a concrete curb between car and bike lanes

Making sure there's a location for emergencies (fires, floods, freezing temps w/ power outages) could be used also as an indoor sports facility.

More indoor during winter

Property downtown for theater - can get for almost nothing.

Mini golf course at ponderosa. Performing arts center downtown with railyard

Thank you!

We have beautiful facilities now and need to have adequate funds to maintain these expanding. People vote with their pocketbooks! The rodeo bleachers and some Donner Lake Piers need work! All other facilities in strategy 1 are great!

Playground for Coldstream Park

stand alone senior center

Youth sports has grown tremendously. We need more fields. We need better indoor facilities to meet everyone's needs, especially student athletes. They need these indoor facilities to be competitive; they need to train year-round without leaving the area to find a team.

Increase the number of garbage cans and the time and attention to empty and clean. Thank you.

indoor access much needed - thanks!

Mciver Arena is a huge part of keeping the horse community thriving and growing in Truckee! As a local equestrian, we use it a ton and I want to continue our access to it. It does need some upgrades and attention!!

Squash courts! Indoor tennis! 

New parks in different parts of Truckee would be incredible

There is no discussion of McIver arena / equestrian facilities. We appreciate the availability and upkeep of this facility! We are very in favor of development of the Old Greenwood parcel into a park.

See previous comment, noting the lack of mention of MacGyver Arena and the importance of its continued use as an equestrian facility in need of renovation. Thank you.

Outdoor turf sports fields would be usable much longer than current outdoor grass sports fields, but would cost a fraction of building an indoor field house. Both would be great though.

We need to address the McIver Arena as a facility that lends itself to the greater identity of Truckee. If lost we fade into being a suburb - Jackson Hole has done this well and the community is booming. Adding this to the plan is an easy way to keep a diverse identity for Truckee.

Equestrian Community

There is no mention, at all, of McGiver Arena. This should continue as a full time equestrian venue. The Truckee Rodeo is a huge plus for the town. The arena infrastructure needs to include permanent rest room facilities. The arena shoud be considered for expanded incoming venues when not utilized by the equestrian community. Example: Outdoor concerts; Stihl Timbersports competition ( which would be televised by ESPN ), winter competition events.

McGiver Arena has a very important Truckee History component and should not be ignored.

Horseback riding has had a long legacy in the Tahoe-Truckee area. However, other recreational pursuits, particularly mountain biking, seem to garner the most attention. Mountain bikers have nearly displaced equestrians due to their numbers and lack of trail courtesy. If you improve recreational access and safety for equestrians, they will come back. Horseback riding is a terrific family-friendly pastime that is being pushed out of our town. Please consider the needs of the equestrian community in your master plan.

Continue to maintain the horse arena and facilities. The rodeo is a huge attraction in summer. The equestrian community needs a place to use in summer for all horse events.

## A Call to Preserve Our Historic McIver Arena

Our historic arena is more than a structure—it is the soul of our town. For decades, it has been where neighbors gather, children learn, and traditions thrive. From rodeos and fairs to concerts and celebrations, the arena has brought us together and given us memories that define who we are.

But today, this cherished place is at risk. If we allow it to fade away, we will lose not only a building but a vital piece of our heritage and identity. Once gone, the history it holds and the role it has played in uniting our community cannot be replaced.

Preserving and restoring the arena is not just about honoring the past—it is about investing in our future. A revitalized arena can once again be the heart of our town, a gathering space that fuels local pride, supports small businesses, and attracts visitors who value authentic community traditions.

We are calling on everyone—residents, leaders, and friends of our town—to join together and ensure this landmark continues to stand tall. With vision, commitment, and community spirit, we can save the arena and pass it on as a living legacy to the generations to come.

Let's not lose what makes our town unique. Let's preserve our arena—the heartbeat of our community. Please include this in the Master Plan.

Please consider upgrading McIver Arena to become a multiuse facility. Along with the rodeo association and the Truckee Donner Horseman's, there are funding opportunities available to create a viable venue for concerts, ice-skating and equestrian sports.

No

In rehabbing current facilities, focus on making the facilities more multipurpose. For instance, upgrading McIver Arena to be an equestrian facility in summer and an ice-skating rink in winter.. also providing year-round access by supporting the plowing of bike and walking paths. I think it's really important to provide all weather recreation facilities for our student sports.

riverview and other facilities should transition to turf and snow removal capabilities

Acknowledging Equestrian access to trails and updating/maintenance of McIver Arena.

Keeping the current facilities ex. Disc Golf, pickleball courts, equestrian arena

And a whitewater park so that all folks of all ages can enjoy our treasured natural resource.

Thank you for your time and energy you put into our town and community.

Don't forget the equestrian community which has been an integral part of Truckee!

Open Land / No facilities. Stop pouring concrete on open land.

Would like more Equestrian friendly---no motorized or E-bike type vehicles or only horses trails.

Equestrian access to trails. Non-paved trails for hikers and horse riders. Staging areas for horse trailers. Maintenance of McIvers Arena and stadium with expanded public use of the arena.

Equestrian access to trails

The reason I couldn't be more positive about these questions is you never gave information on where all this improvement might take place. The new proposed disc golf course borders a residential neighborhood where people ride bikes and horses. random flying frisbees could cause injury. And it seems the park dept is wanting to develop McIver arena, which I would be against. That arena and surrounding area was donated to the parks dept with the contingency that it remain for equestrian use. That should be respected and honored in the name of the Joseph family. Please do not take that away. Rodeo donates thousands of dollars to the community every year. We are a growing group in this community and we deserve a place to recreate just like everyone else. You mention a skate park, but you never mention equestrian activities. Just where would all this new growth take place? If that were included in the questionnaire we could make more positive suggestions.

Equestrian facilities & access. Horses are an important part of Truckee history. Rodeo sells out every year. Would love to see more horse trails, facilities and access.

Equestrian families and use. We are a mountain town in the West. Horses were a key part of our history and we can't push them out.

Parking is not adequate for many park activities/events.

Key recreation partners have not been overtly engaged in the conversation about existing facilities and community needs. For example, there is no mention of equestrians / horses or any aspect of McIver Arena in the Regional Park - yet the skate park and other small-demographic rec user facilities are specifically called-out. Also, Strategy #1 and Strategy #2 are way too generic to clearly know whether they satisfy existing needs or not.

Truckee is in desperate need of field space outdoor and indoor!

Yes. There should be specific rules and guidelines about how new facilities are named. We, the taxpayers, paid for/ will be paying for these places and the Steve Randall naming was a disappointing surprise to many and NO information was sent to us about that. Felt like an inside job by the TDRPD board.

These improvements can't happen fast enough. The community has grown and this is much needed. This is a solid plan and I look forward to seeing it come to life.

Part of the beauty of the area we call home is natural wilderness. Be really thoughtful about ideas to take down the surroundings in the name of paving or more of the same kind of parks we already have -- that just makes us look and feel like other areas, whether cities like the Bay, or suburbs like in Sac area. We aren't those places and it's important to balance needs with what makes this place unique and who we are.

Desperate need for Indoor space, in particular for volleyball to accommodate a huge demand the community

Truckee has grown significantly over the last 10-15 years and indoor facilities have not kept up with the growth which limits sports opportunities for our youth. Currently, many sports compete for the extremely limited gym time that is available and it makes growing and sustaining youth sport programs difficult or even impossible. Because of this, many local youth travel to Reno to play for volleyball, basketball, and soccer. This limits access for kids whose parents cannot drive them several times a week, forces kids to sit in the car for several hours per week, and takes away from the sense of pride and community one gains from competing for a local team with others from the same town. Please, please, please consider expanding indoor gym space and allowing local sports clubs to rent the space.

Indoor facilities similar to new Reno SportsDome... volleyball, basketball, soccer, etc is all accomodated

While pickle ball courts may be 1/2400 residents, nearly all communities have courts as well, so I do not think this is an unmet need. I think it is bonkers that we have this huge number of athletes and no indoor sports complex to support them in the winter months. A complex that supports public use as well as team activities.

I think that within your survey and planning you need to separate out the indoor sports facility from the performing arts project since they are very different in scope and we already have a performing arts, we don't have an indoor sports facility for kids. Can the additional flex use space with the planned new library be used for performing arts as well. Seems like you are duplicating efforts and funding?

The need for additional youth sports fields. Truckee is growing and demand will only increase

Indoor basketball and soccer for kids!!

I very much applaud efforts to make the existing facilities top notch and the next biggest gap is absolutely, without a doubt, the need for top tier indoor facilities.

No

An indoor winter sports complex - ice rink, soccer, basketball, pickleball/tennis - would be huge for the community

Giraffes are not specific. Each draft contained multiple items that should be separated out. For example, an indoor sports facility is a separate endeavor than a performing art center. The demand and impact for these is very different and prioritized differently.

Look at where money is wasted in "improvements" each year. How much did it cost in staff, supplies, contractors, equipment, etc., to redo RVSP 1, 2, and Joan Kelly? That investment is already gone because the fields have already been destroyed, and they should have been converted to turf. The grass is costing us so much money. Turf allows those fields to be year-round (almost) and allows for all sports to use the space without extreme damage.

Community arts location!!

Need new fields and a indoor facility

The new proposed library taking up valuable park space is a travesty. it should have been a multi use pavilion/ice rink going there. We have limited park space for outdoor activities, no field house, no ice rink. A library can be built anywhere, like the railyard.

Of course the library supporters want to be in a park (how quaint!) but no park supporters want a library in their limited space.

Massive FAIL for planning, Truckee

New Skatepark!!!!!!

Rocker Memorial Skatepark and build executed.

Parks that provide play opportunities for children of varying ages

We should get the skatepark built

I assume TDRPD does not receive adequate tax revenue to do all the things outlined on this survey. Why doesn't TDRPD join the Town of Truckee? It seems the Town receives a lot of our tax dollars (and visitor tax dollars) from various taxation paths, and some of these funds could be prioritized for the identified needs in this survey.

The truckee bike park looks terrible. The terrain wasn't open this summer. No signs anywhere. It needs to be taken care of by the professionals who know what they are doing and not be ruined. Please consider using Courtney and brooks again!

This looks like a great summary!

Please spend some time visiting or researching other towns that have grown smartly. small towns that have welcoming facilities but also the infrastructure (i.e. wider roads, parking, staffing) to support the growth. We are in a critical time in truckee where we can either continue to add amenities and find that no one can get to them (ie. traffic and parking is impossible) or we can build literally for our future and also expand our crumbling infrastructure to support it. Kids are not going to go play pickleball. We have NOWHERE for our school-aged (2-18) to go hang out during school breaks, afterschool, early release days, etc. Indoor facilities that aren't over priced or hard to reach (Woodward) are imparative for their development and the communities mental health. A large number of community members don't ski, so what is for them to do during winter?

More bike park staff!

Your survey is not very clear. Expanding fields and indoor options should be a priority. A long term plan for the bike park is a priority. What has happened there this summer is a disappointment and dangerous

Good ideas.

N/A

Would love to see the Regional Park ice rink get an update. Also a safer pedestrian/cyclist connection between Olympic Heights and the Legacy Trail.

If the library will eventually replace the maintenance shed at the regional park, where will people park? Already parking is tight for the farmers market and for soccer/baseball games. Could more parking be available on the street? Could we work with the city or the county on that?

Redo your web page to make it more user friendly. It is extremely difficult to navigate

grooming of golf courses in winter for cross country ski use

A rad bike park and skatepark is necessary for the community we live in. I'm really excited for a new library as well, hopefully that will allow for expanded book/media access both hard copy-wise and digitally. I also hope a big part of the shade plan is leaving large trees and growing some more as that's the best kind of shade.

Consider demand for existing facilities and have that direct expansion and additions - field space especially seems to be at a premium. All weather options (they don't necessarily need to be inside) would be heavily used by field sport athletes year-round. Beyond pickleball, also consider the significant growth of soccer, football, and lacrosse.

I do not like the general urbanization that is planned for the regional park. Between the library and the kids zone and other improvements, it's going to increase traffic and make the area much less park like than it currently is. The effect on the disc golf course is not acceptable in my mind. These projects should find other locations.

Splash pads.

And less focus on sports fields and West End Beach

### Rocker Memorial Skatepark

True indoor soccer facility and more adult soccer opportunities, please!

Would love to include more wide flat paved walking paths to encourage moderate aerobic activity, accessible to all and can be used summer and winter.

I only voiced reservations about these plans because you did not indicate where these new facilities are going to go. If they are going to take the place of McIver Arena, then I would not be in support of that

I was disappointed not to see the Railroad Museum with the model train in the Truckee river Regional Park as a priority

We really need a dog park to provide especially little dog a safe place to exercise and socialize. A dog park is also a tremendous community building tool.

Connect bike paths so that all neighborhoods can bike roll walk to anywhere in town. For example, residents in Prosser lakeview have to bike or walk on dangerous streets to get Downtown or to riverview or any other park...there is no multi-use path for that neighborhood and other neighborhoods, which forces more car use and creates more traffic and parking congestion.

New library! Environmental

Consideration of any project.

Indoor ice rink

Open the Riverview Sports Complex parking earlier in the spring season or even year-round for access to the Legacy Trail.

,snow removal on all paved (new and current ones) paths in winter

Expand winter services at existing facilities such as bathrooms and parking.

Don't build facilities under the airport flight paths. Av gas contains lead and the airport is polluting our youth. I am engaging with the public health department on this oversight

N-a

donner lake access for resident's boats

A year round indoor ice arena.

I hope that this results in more place-based expansions in facilities. As much as i appreciate that Pickleball is a growing sport.. i would consider the demographic and place where that is the specifically the case. People live here to do things that are specific to our environment.. skiing, snowboarding, mountain biking etc. Court sports can be done anywhere else so i hope that activities and facilities that are unique to our region will be prioritized... Program wise - I would personally love to see more programming for younger kiddos 2-4 years that is geared more towards working parents (weekdays after 4pm and weekends) rather than the stay at home parent and tots classes at 10am on a tuesday...

I feel the bike park is one of the most amazing assets in Truckee. Cortney and Brooks have poured their heart and soles into creating a magical place for our kids to become amazing humans and athletes. The number of families that use that facility and the growth and smiles that I see every time I go there is incredible. This survey is difficult because it doesn't address the issue that I think is important- rather than building more I think you should focus on making what you already have better and free. I hate that when I go to the bike park I feel like I need to give money or when I go to a dock I'm asked for a donation. Why would you build more if you can't afford to maintain what we already have?

Vote no for the new library no more taxes. No one's gonna use it because no one uses the current one.

Your survey is very biased in what you're looking to do kinda like dancing around other issues to try to get the library that no one wants

Turf fields that can be plowed in winter much like the N Tahoe field in Tahoe Vista.

Partner with the airport and land trust to purchase Joerger ranch parcels adjacent to the ponderosa golf course. You could put so many parks and rec facilities there.

No bonds. No new library without Fed +State + donor funding.

Fix that baseball field at Regional Park. It's a disaster

Look to towns like Boulder CO that have fantastic recreation options to model after.

Protect cyclists and pedestrians, especially in neighborhoods. Sierra Meadows is scary to bike in/out of on Martis Valley Road without a bike lane and cars going too fast.

Pickleball has rapidly become America's fastest-growing sport, with participation exploding by over 158% in just three years. This incredible growth, which has brought millions of new players of all ages into the game, highlights the urgent need for dedicated, indoor facilities in our community. An indoor venue would eliminate weather-related cancellations, allowing for year-round play and consistent access regardless of rain, wind, or sun. Beyond providing a weather-proof environment, an indoor pickleball facility would foster a robust social hub, offering leagues, tournaments, and a reliable space for residents to meet, connect, and stay active. The controlled conditions of an indoor facility, from consistent court surfaces to climate control, would not only enhance the playing experience but also help reduce the risk of injuries. This investment would provide a crucial social and recreational asset, promoting healthier lifestyles and strengthening community bonds for years to come.

I did not see the Donner lake docks and shoreline erosion addressed specifically. Two issues I see are the docks need to be replaced and erosion along the shoreline dealt with. I hope these issues are being or can be addressed with these strategies.

thanks for having this survey available to the community!

Making ponderosa into a Nordic ski trail in winter

No addition taxes, no diversion of park \$ or resources to subsidize the library or other non-park facilities. Serve general users not narrow special interests.

Please don't pave over existing dirt trails.

Bike parking is useless unless it is secure because bike theft is rampant and it's extremely difficult to carry a heavy enough lock system to seriously slow a thief down. So please investigate means of providing that to truly increase peoples' ability to bike to these recreation sites. Also ?equestrian trailhead? For all two of them? Sounds irresponsible to me.

There is a lack of playgrounds north of highway 80, especially in the area near the middle school where there is higher density and more affordable housing with many children. Families would frequent parks much more if they are distributed and are able to walk or bike ride to parks and not have to get in the car.

There should be opportunities for park/playground space along the route of the upcoming Pioneer Trail and Bridge Street Extension Project

#### Full size ice rink

Please do not reduce the scope of the bike park to achieve lower maintenance costs!! Bike Park is the best community asset IMO. Because of the size and diversity, it attracts people from all over, adding economic value for the community. It helps keep kids active and can change their life positively. Reduced size will hurt the community. Instead try fundraising or some other way to secure funds, it's well worth it. WAY more important than anything else in the budget.

Please clean up the area at the rear of the rodeo grounds. Remove the old old semi trailer and storage units and do not use as a storage area for boats metal beams and other items on both sides of the fence. I am a neighbor and I don't feel this unsightly storage would be allowed any where else in public view. Move it please.

Budget and avoiding increased tax or assessments.

#### CONNECTIVE NETWORK OF TRAILS THAT LINKS ALL PARKS AND NATURAL FEATURES OF TRUCKEE

Everyone in Truckee seems to own a dog, like I do, and most like them to be off leash even in leash-only signed areas. I visit the regional park daily and every single day I see people with off leash dogs including on the Legacy trail. My dog, even while leashed, has been attacked countless times in the park and throughout other city run areas. There needs to either a small enclosed dog park where this is allowed or more monitoring by the town.

The new library location does not impact the regional park facilities as mentioned in this survey.

Rocker Memorial Skatepark has obtained the necessary CEQA and ToT Permit Approvals to build. Over 12+ years of fundraising and community events have gone into getting RMSP to this point. RMSP has spent over \$250K getting through the permitting process and has a dedicated account with TDRPD for construction funds, currently with over \$350K invested. This project can begin construction immediately (with funding), and be completed in 2026. RSMP was approved as part of the Regional Area Master Plan from TDRPD in 2020 and volunteers have been working tirelessly to advocate for funding and grants, recently receiving \$125,000 from TTAD.

I believe there is a strong need for indoor field space, especially for soccer, lacrosse, and track/athletics. One thing not addressed in the Master Plan is the ice rink. Understanding that these facilities are very expensive, I still would like to see an indoor facility or expansion of outdoor facilities to allow for a regulation-sized ice rink.

The Community Arts Center needs an Arts focus, not child care, we need that too, but child care should not impede the Arts, which is in the name of the building.

It seems like park facilities are the realm of the Parks and Recreation department and it seems weird that y'all are foisting these off on "partners".

Need to consider the already overcrowded access to West End Beach. Money invested in West End Beach considerably contributes to the problem. Invest in solutions that spread out the community rather than causing the problems with traffic, overcrowdedness, etc...

# TDRPD COMPREHENSIVE MASTER PLAN
